

The example below assumes that you enter Seattle University with junior standing (90 credits), have earned a transferable associate's degree, and have successfully completed the following:

- Earned a transferable associate's degree
- A full year of General Chemistry, Calculus, and Calculus-based Physics

If you have already taken a full year of Organic Chemistry, then your junior year will be devoted to completing Math and Physics requirements and you will need to take CHEM 3000 and CHEM 4985 in Fall quarter. CHEM 3510/11 and CHEM 3520/21 will replace Organic Chemistry in the Winter and Spring quarters.

Visit the Transfer Equivalency Guide on the Transfer Tools page (<https://www.seattleu.edu/registrar/transfer-tools/>) for more information on how your credits may transfer to SU. Courses from your college/university that are not in the Guide may have equivalencies in SU's course catalog (<http://catalog.seattleu.edu/>). All courses on your incoming transcript will be evaluated for equivalencies after admission to SU.

*This is a sample and not the only way to complete this plan. Number of credits are in parentheses. *Some classes have prerequisites.*
