Weather

Seattle is famous for its rain, but visitors are often surprised to find that most of our summer days here in Seattle are warm and sunny! In order to provide you with the best possible experience while staying on our campus, we'd like to prepare you for the possibility of summer temperatures reaching 90°F or higher with no in-room cooling.

Ask us about your options for beating the heat! Our recreational swimming pool is popular during the summer months and guests may use their conference card to access the air-conditioned Student Center.
